EMMANUEL GELE-AGBAI

Frontend Developer

geleagbaiemmanuel@gmail.com | +234 816 668 9567 | Nigeria | github.com/Emmanuelsomto

SUMMARY

Frontend Developer focused on building clean, performant web tools and user interfaces using React, TypeScript, and Tailwind CSS. Driven by continuous technical curiosity, actively exploring Solidity and smart contract security concepts alongside ongoing plans to expand into full-stack development (Node.js, Express, PostgreSQL).

PROJECTS

AniVault - Anime Discovery Platform Aug 2026 – Present

Stack: React, TypeScript, Tailwind CSS, Vite, REST APIs | anivault-gilt.vercel.app

- Architected and deployed a responsive single-page application utilizing React, TypeScript, and Vite.
- Engineered asynchronous data-fetching workflows to integrate real-time data from external REST APIs (Jikan and Kitsu).
- Implemented custom breakpoint layouts, dynamic search filtering, and client-side SPA rewrite rules on Vercel.

DevPulse - Developer News Aggregator Sep 2026 – Present

Stack: React, Tailwind CSS, Vite | dev-pulse-eight-orpin.vercel.app

- Designed and deployed a dark-mode developer news aggregator delivering real-time feed updates.
- Optimized user interface performance focusing on zero layout shifts, high-density typography, and fluid cross-browser responsiveness.

openBoom - Music Discovery Web App Oct 2026 – Present

Stack: React, TypeScript, Tailwind CSS

- Engineered modular artist spotlight components and interactive audio preview flows driven by structured mock JSON datasets.
- Leveraged React, TypeScript, and Tailwind CSS to build maintainable, type-safe UI components.

EDUCATION

Federal University of Technology, Owerri (FUTO) Aug 2023 – Sep 2027

B.Eng. Chemical Engineering | Owerri, Nigeria

SKILLS & INTERESTS

Frontend & Core: React, TypeScript, Tailwind CSS, JavaScript (ES6+), React Router, Vite, HTML5/CSS3

Learning & Security: Solidity (Basics), Smart Contract Auditing Concepts, Node.js (Learning)

Tools & Workflow: Git, GitHub, Vercel, VS Code, Linux (Terminal)
